Second strand was primed with a BamH1-dC primer [5'AGAGACTCGGATCGCGCGCGCARTAATATAT(C) 3']. Double-stranded cDNA was then digested with BamH1 and XhoI and directionally cloned into the BamH1 and SalI sites of lambda pSB vector. Library went through one round of normalization. Library was constructed by Wei Yu at RIKEN of Japan (Carninci P, Westover A, Nishiyama Y, Ohsumi T, Schneider C, Hayashizaki Y, High efficiency selection of fill-length cnuh by improved bioringless as the construction of the control 
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              Schneider C, Hayashizakı r, nıyı, cırıcı çaptırapper., füll-length CDNA by improved biotinylated cap trapper., DNA Res 4: 1, 61-6, Feb 28, 1997)*

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         seq length: 0 seq length: 2000000000
                                                                                                                                             5.4.
